

WAR

War, always changes

The current world population is

7.6 Billion

7,620,632,123

To be exact

That's

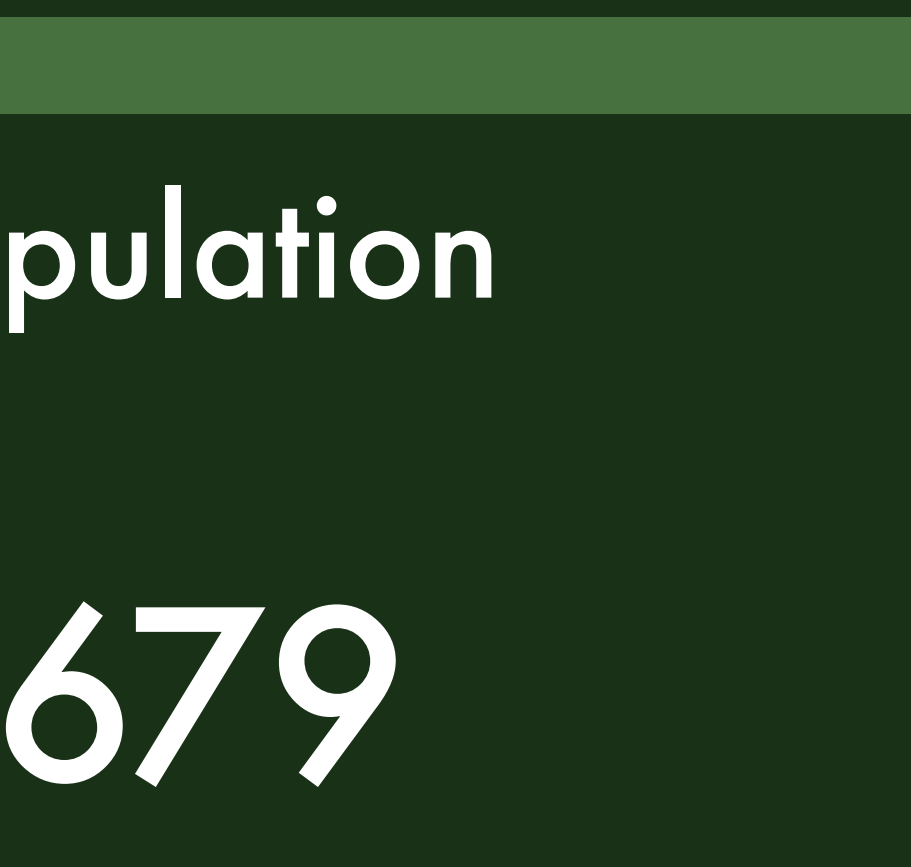

49,129,726

Births this year

&

20,349,200

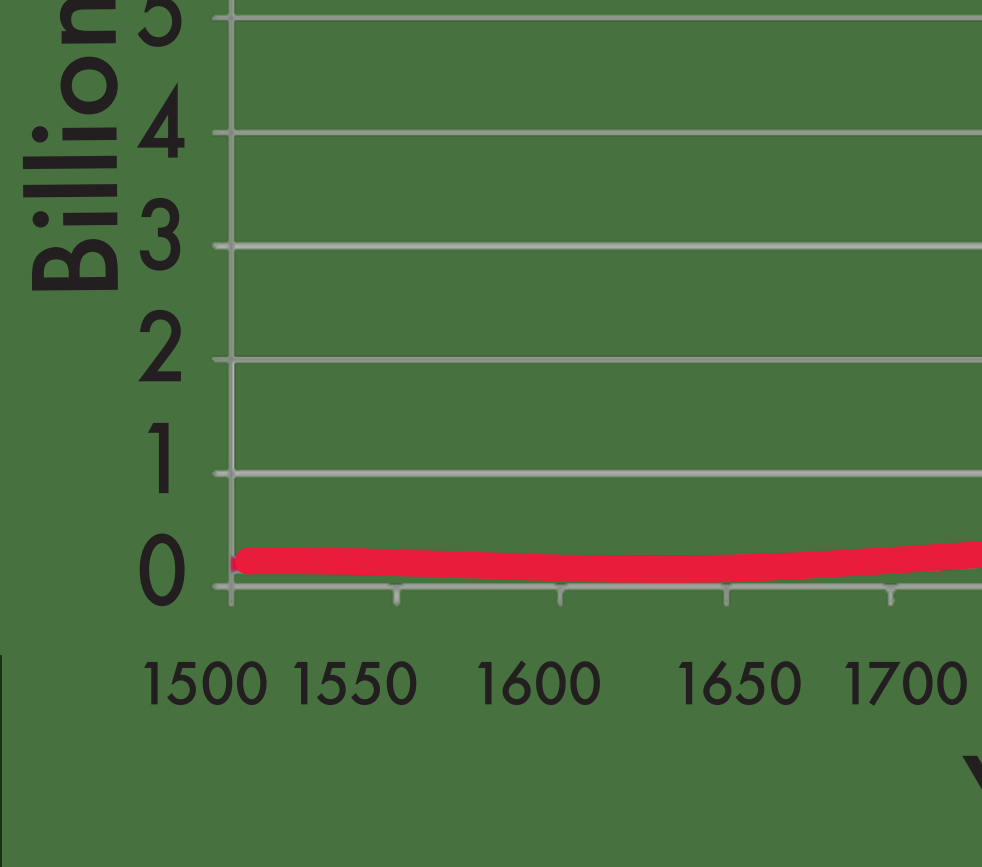

Deaths

Which means the population has grown by

28,780,679

People this year

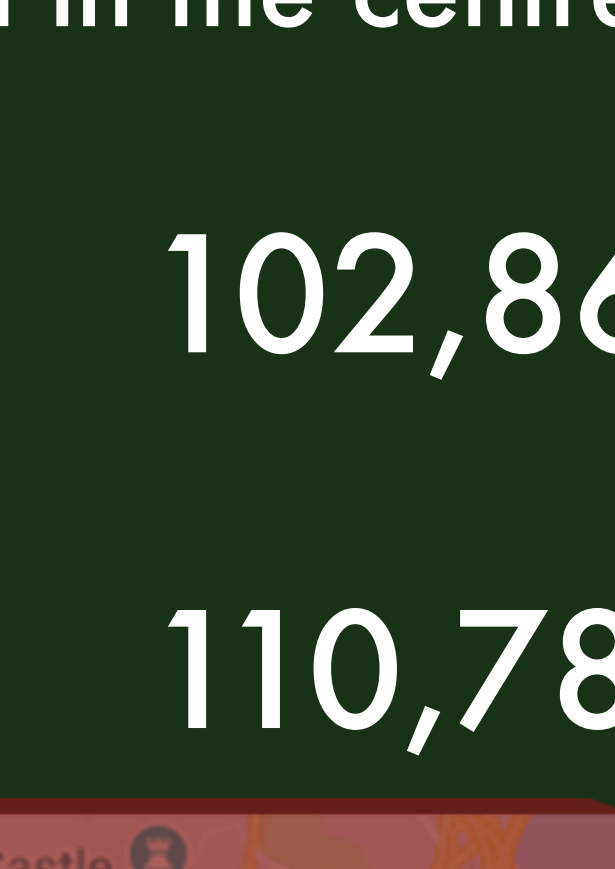

And the UN expects this number to grow by 2050 to:

9.7 billion

However

What would happen if a nuclear war broke out??

If a 300 KT yield W-87 (American Missile)

Was detonated in the centre of Belfast there would be:

102,866 Fatalities

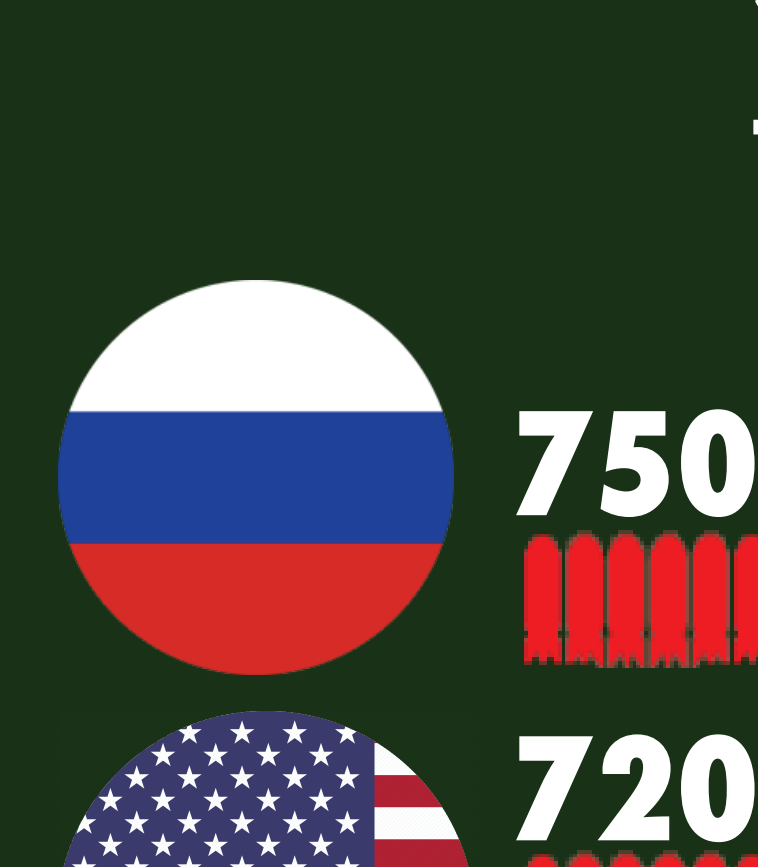

&

110,788 Injuries

The estimated casualties of an all out nuclear war is thought to be

600 million

which is 10x the amount killed in ww2, the deadliest conflict in history.

Even though the cold war is over there are still thousands of nukes today
